

COBUS Interfaces

Data transfer from
window construction systems

CAD / CAM

Integrated processes

Window construction systems offer solutions for daily working routines. Planning and construction is done within one software solution. With the interface the single construction parts are smoothly transferred to COBUS NCAD, and COBUS NCAD creates the CNC programmes for production fully automatic.

Advantages of COBUS NCAD

- Well-trying, reliable software from COBUS ConCept, the no. 1 amongst CAM suppliers, successfully in the market for more than 20 years.
- Fully automatic CNC programme creation for each machine control up to five axis. Adjusted optimisations and mounting aids significantly reduce production times at the machine.
- 3D simulation to reduce unproductive test runs at the machines.
- Unbeatable extensions of performance with the trade solution COBUS Doors boost up the performance of COBUS NCAD.
- Support by the capable COBUS NCAD Support organisation.
- Easy to install and to apply.
- Our CAD/CAM team with more than 20 employees is at your disposal.

Modern CAM software can represent a significant additional value for machine investments, but it only causes a fraction of the costs that arise for machine and tool acquisitions.

With these systems we „can“!

For the following software products (window construction) we have interfaces with COBUS NCAD:

- ADULO Solutions GmbH, D-97265 Hettstadt
- Horst Klaes GmbH und Co. KG, D-53474 Bad Neuenahr-Ahrweiler
- Prologic Computer GmbH, D-97228 Rottendorf
- 3E Datentechnik GmbH, D-73447 Oberkochen
- Groeneveld Automatisering, NL-3253 BP Ouddorp (ZH)
- Logodan as, DK-8600 Silkeborg

This is COBUS ConCept:

A German IT company of system engineers who have been reliable partner to wood-working manufacturers for more than 25 years. They offer professional systems and solutions, design and optimize databased business processes and integrate bespoke software solutions for CAD/CAM automation techniques.
